Lab 2 Small Business Taxes

## Lab 2 Small Business Taxes

Page 145 #12

Checkpoints:

- Documentation
  - Name
  - Lab Number, name and purpose
  - Minimum of 4 other meaningful comments in the code (e.g. *//Statements* is NOT meaningful)
  - Self-documenting variable names
- Rate of state sales tax of 5.5% is to be a preprocessor directive (this means the identifier must be all UPPERCASE).
- Rate of county sales tax of 2.3% is to be a memory constant declared local to main().
- Test data: January, 2015 and total collected of 71998.67
- Output is to contain your name printed using cout object
- Output is to be copied and pasted as a comment below the source code.
- Decimal points must be lined up beautifully as shown in Week 3 notes.
